

End of Life Handbook

A Compassionate Guide: What every family should know who is caring for a dying loved one and experiencing a Life-Threatening and Terminal Illness.

It is written specifically for families to address both the emotional issues associated with life-threatening illness and the practical and medical realities typically dealt with at this time.

“The families of our patients frequently expressed a desire to understand more fully what their loved ones were going through and how best to help. Medical providers, for their part, often observed that family misunderstandings presented barriers to patients getting the best care possible. It was this set of circumstances that led us to write our book.”

Presenter & co-author David. B. Feldman, PH. D. of
Santa Clara University

Thursday, February 12, 2009
7:00 ~ 8:30 p.m. at St Joseph of Cupertino
in the Parish Community Center
